### **Feed Energy Company Supports State Science and Technology Fair of Iowa Winners**

**Des Moines, IA – June 5, 2007** – Feed Energy Company today announced that they have made a contribution to support the State Science and Technology Fair of Iowa. The contribution was made to help offset the costs of sending the state winners to the Intel International Science and Engineering Fair in Albuquerque, N.M. The top high school team as well as the top two high school winners attended the competition in May.

“This is about more than just helping these bright kids with the expense of travel to the international event,” states Bob Riley, FEC President. “If we expect the youngest generation in the State of Iowa to embrace the study of science and compete with students from all over the world, we need to support them in any way we can.”

Feed Energy Company is an agribusiness firm primarily engaged in processing soybean oil co-products focused in feed, agronomy, dust control, fuel, and industrial and fertilizer applications. The company is one of the largest acidulators of soybean soap stock in North America and produces scientifically balanced ingredients specific to their customers' needs. The company headquarters and original production facility have been in Des Moines for more than 30 years, with additional Iowa production facilities in Sioux City and Pacific Junction.
