Feed Energy Company Earns Safe Feed, Safe Food Re-Certification

Des Moines, IA – August 7, 2009 – Feed Energy Company today announced that their three production facilities have been re-certified for the prestigious Safe Feed, Safe Food program from the American Feed Industry Association. The certification program is designed to demonstrate proactive food safety leadership among those companies who are dedicated to delivering a safe and wholesome feed supply for the growth and care of animals.

"We worked very hard to achieve our initial certification for Safe Feed/Safe Food back in 2006," states Bob Riley, President and CEO of Feed Energy. "The fact that we've been re-certified is really a validation of what we believe and how we as a company operate. . .our products are developed and produced based on our scientific expertise and safety is always at the top of the list when it comes to production."

Safe Feed, Safe Food participating companies include a select number of feed manufacturers, pet food manufacturers, ingredient suppliers, integrated producers, meat processors, livestock producers and others who want to validate a commitment to feed safety and proactive leadership.

Feed Energy Company is an agribusiness firm primarily engaged in processing soybean oil co-products focused in feed, agronomy, dust control, fuel, and industrial and fertilizer applications. The company is one of the largest acidulators of soybean soap stock in North America and produces scientifically balanced ingredients specific to their customers' needs. The company headquarters and original production facility have been in Des Moines for more than 30 years, with additional Iowa production facilities in Sioux City and Pacific Junction.
