

Delivering the MOST COMPLETE ENERGY PACKAGE for All Your Nutritional Needs.

With Standard or Custom Energy Products Available, FEED ENERGY Has the Right Product for You.

For more than 30 years, Feed Energy has been the premier provider of feed energy solutions for the livestock and poultry industries. It is our objective to continue to be the company recognized for the highest quality and safest products, producer-focused energy innovation, and industry leadership.

At Feed Energy, we understand the challenges you face. We offer only the highest quality, scientifically formulated products to all of our customers, regardless of the size of their operation. Our customers demand the best so we never compromise on the quality or safety of the products we produce.

FEC AV4000

All Veg 4000 is a carefully manufactured natural energy source scientifically derived from products of vegetable oil-seed processing. Naturally rich in antioxidants, AV4000 assures you of the highest energy source available for nutritional and industrial applications. AV4000 can be relied upon to contain 4000-4050 kilocalories of metabolizable energy/pound.
